

Conformation Faults

USPC D Manual pp243-5

Conformation means the way a pony is built

Why is good conformation important? A pony with good conformation can:

- 1.
- 2.
- 3.

Head

Good

Faults

- 1.
- 2.
- 3.

Neck

Good

Faults

- 1.
- 2.
- 3.
- 4.

- 1.
- 2.

Shoulder

Good

- 1.
- 2.

(from end of mane to
the point of shoulder)

This gives longer strides, smoother
gaits, and easier to jump

Faults

- 1.
- 2.

Causes rough gaits, shorter stride and
harder to fold front legs when jumping

Pasterns

Good

- 1.

Faults

- 1.
- 2.
- 3.

Back

Good

- 1.
- 2.
- 3.

Faults

- 1.
- 2.
- 3.
